ACCESS LAYERS SWITCHES

HP2824-DS3 (MSTP Support)

Trunk 17,19 Trk3 Trunk / Add missing VLANs

Linksys SRW2048 (MSTP Support)

LAG4 G24 + G48 / Add missing VLANs

HP1820-BOTTOM (RSTP Support)

TRK8 47 + 48 / Add missing VLANs

HP1820-TOP (RSTP Support)

TRK7 47 + 48 / Add missing VLANs

HP1800-DS1 (No STP Support)

Locate Uplinks / Reset & reconfigure / Add missing VLANs

HP1800-DS2 (No STP Support)

Locate Uplinks / Reset & reconfigure / Add missing VLANs

WORK TO BE DONE

PHASE 1

Backup all switch configurations

Reboot all switches

Run Test-Connectivity on each switch

PHASE 2

HP1800 - DS1 (No STP) Note uplink cabling / IP address / Reset & reconfigure / Add missing VLANs

HP1800 - DS2 (No STP) Note uplink cabling / IP address / Reset & reconfigure / Add missing VLANs

Add missing VLANs on all other switches

Test reconfigured switches / Run Test-Connectivity on each switch

PHASE 3

Identify marked ports on ProCurve 5406 & 5412 and note connected devices

Consolidate identified ports on ProCurve 5406 & 5412 to a single module on the 5412

Configure new uplinks / trunks on ProCurve 5412

Amend MSTP config on ProCurve 5412

Consider / examine why Port F4 is in blocking state on ProCurve 5412 (potential loop)

PHASE 4

HP1800-DS1 Move uplinks to ProCurve 5412 / Run Test-Connectivity script

HP1820-TOP Configure RSTP, move uplinks to ProCurve 5412 / Run Test-Connectivity script

HP2824-DS3 Configure MSTP, move uplinks to ProCurve 5412 / Run Test-Connectivity script

SRW2048 Configure MSTP, move uplinks to ProCurve 5412 / Run Test-Connectivity script

HP1800 DS2 Move uplinks to ProCurve 5412 / Run Test-Connectivity script

HP1820-BOTTOM Configure RSTP, move uplinks to ProCurve 5412 / Run Test-Connectivity script
